

HEMALATHA .P

TRAINER

GITHUB LINK : github.com/hema-latha-perumal :

PROFESSIONAL SUMMARY:

Results-driven Full Stack Developer and Technical Trainer with 3+ years of experience in Java development and Data Structures & Algorithms (DSA). Skilled in building scalable web applications using Java, RESTful APIs, and MERN stack technologies. Strong expertise in database optimization, SQL-based data analysis, and Snowflake cloud data warehousing. Experienced in applying DSA concepts to improve performance and solve complex problems efficiently. Proven ability to deliver technical training through workshops, bootcamps, and Student Development Programs (SDPs). Passionate about developing high-performance applications and bridging the gap between academia and industry.

PROFESSIONAL EXPERIENCE:

Karyoun innovation pvt ltd - Chennai

Technical Trainer

- Developed scalable backend applications using Java and object-oriented programming principles
- Designed and implemented efficient algorithms using Data Structures (Arrays, Linked Lists, Trees, Graphs)
- Built and optimized RESTful APIs using Java frameworks (Spring Boot)
- Applied DSA concepts to improve application performance and reduce time complexity
- Optimized SQL queries and database performance, reducing response time by 30%
- Designed and managed relational databases with efficient schema structures
- Conducted training sessions on Java, OOP concepts, and Data Structures & Algorithms
- Guided students through problem-solving techniques and coding best practices
- Solved complex coding problems and mentored learners for technical interviews
- Delivered multiple projects focusing on backend logic and algorithm optimization

KEY ACHIEVEMENTS :

- Successfully delivered 10+ backend-focused projects using Java and efficient algorithm design
- Improved application performance through optimized data structures, indexing, and query tuning
- Reduced processing time by 40% by implementing optimized algorithms and logic improvements
- Built scalable backend systems and admin dashboards handling real-time data processing

TRAINING & WORKSHOPS DELIVERED :

- SRM Institute of Science and Technology (SRM), Tamil Nadu
- Adhiyamaan College of Engineering, Hosur
- St. Joseph's College of Engineering, Chennai
- Dr. M.G.R. Educational and Research Institute, Chennai
- Palleru Institute of Technology, Andhra Pradesh
- Bharathiar University, Coimbatore
- RAAK College of Engineering & Technology, Puducherry

TECHNICAL SKILLS :

Frontend Development

HTML5, CSS3 Bootstrap /
Tailwind CSS Responsive Web
Design

Database Technologies

MySQL MongoDB PostgreSQL
(Basic) SQL (Joins, Subqueries,
Window Functions, CTEs)

Backend Development

Python, Java C, C++,

Data Structures & Algorithms

Arrays, Strings, Linked Lists Stacks
& Queues Recursion & Sorting
Algorithms

GITHUB

- Version Control: Git (git init, git clone, git add, git commit, git push, git pull, git branch, git merge)
- Platforms: GitHub (creating repositories, managing code, pull requests, issue tracking)

PROJECTS :

AI-Powered Job Portal (Java / MERN Stack)

- Developed a full-stack job portal with user and admin roles
- Implemented secure authentication using JWT and role-based access control
- Built RESTful APIs using Java (Spring Boot) for scalable backend services
- Integrated AI-based resume ranking system using optimized algorithms
- Designed analytics dashboard for job insights and data visualization

Trainer & Schedule Management System

- Built a dynamic scheduling platform for managing trainers and sessions
- Developed REST APIs using Java for efficient data handling
- Applied DSA concepts to optimize scheduling and conflict resolution
- Designed and optimized relational database schemas for performance

Content Automation Tool (AI Integration)

- Integrated OpenAI API for automated content generation
- Developed backend services using Java for secure data processing
- Built chatbot interface with real-time response handling
- Implemented input validation and optimized logic for faster execution
